### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the claimed invention including a blower and a seal assembly with the feature of a gate plate moveable relative to the inlet and adapted to control combustion air entering the blower from the inlet is not found in the prior art singly or in combination. This patentably distinct feature is found in each of independent claims 1, 12, and 19. The closest prior art reference is considered Taylor (US 4,225,392) in view of Vross et al. (US 5,873,919). Taylor teaches dampers at a blower outlet for combustion air control while Vross discloses a slide gate valve regulating the amount of fumes entering the burner chamber. Fumes are not considered an obvious variation to combustion air control. There is not motivation to combine Taylor with the teachings of Vross to obviate the claimed invention. Hunter (US 3,144,244), also cited in this action teaches a slide gate valve but its use is limited to regulating granular material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
